INSTRUCTIONS FOR THE PROGRAMMING AND ADJUSTMENT

FTQ MODELS (NPN/PNP)

- **YELLOW LED - OPERATION INDICATOR** : This led is ON when the object to be detected enters the sensing range of the photocell giving output signals.
- **TRIMMER FOR THE SENSING RANGE ADJUSTMENT** : The photocell is supplied with max. sensing range with the trimmer totally rotated in the clockwise direction. The sensitivity reduces by rotating the trimmer in the anti-clockwise direction.
- **SWITCH NPN/PNP** :
The device is delivered in PNP mode.
Setting NPN mode :
Power on the device and put the switch in PNP mode, if it is not already in this position.
Power off the device. Put the switch in NPN mode.
Power on the device again and check the NPN output mode.
Setting PNP mode :
Power on the device and put the switch in NPN mode, if it is not already in this position.
Power off the device. Put the switch in PNP mode.
Power on the device again and check the PNP output mode.
