Redefining Soft Starters

With a unique combination of features, performance and size, Motortronics has redefined the benchmark for soft starter design

The incorporation of Motortronics' unique iERS technology allows VMX-synergy™ to deliver unrivalled soft start performance alongside energy saving capability on partially loaded motors.

With product size and cabinet capacity becoming an increasing focus VMX-synergy™ has been developed to deliver the greatest power to size ratio of any soft starter.

In addition, VMX-synergy™ uses Motortronics' globally renowned i42 smart application pre-program suite. This allows the user to program the unit to any common application using a simple 4 step process. To keep pace with modern technology, VMX-synergy™ removes the need for buttons and uses intuitive touch screen technology.

With built in full motor overload protection as well as full data logging, field serviceable fans, upgradeable firmware and extensive input/output programmability, VMX-synergy™ meets all key design criteria.

Full Colour Touch Screen

Intuitive touch screen control on all models.

Plug n Play

The soft starter will 'tune' itself to the load.

Automatic Load Tuning

Optional Remote Keypad

Touch screen remote keypad matching the VMX-synergy™ display.

intelligent Energy Recovery System

iERS is our patented energy saving system with a combined internal bypass to save energy on lightly loaded motors up to 32%.

iERS is a technology that matches the power consumption to the load required. It intelligently monitors and regulates energy consumption on fixed speed motors. It also monitors the voltage, current and power factor during the start to calculate the full load figures. During the running stage, the power factor continues to be monitored.

When the power factor drops, the motor is lightly loaded, and there are losses inherent in the design of a motor causing excess energy to be wasted. These are known as excitation losses. iERS's constant monitoring automatically recognises these costly losses, and in turn reduces the voltage and current, to not only increase the part load power factor, but reduce the energy consumption in kW. When the power factor increases, the motor is more loaded. iERS then automatically activates the bypass to remove any losses within the equipment.

Ease of use

35+ years of experience built in, 60 second commissioning with no manual using i42 and automatic features.

For logging & commissioning:

StarterView MLink software

Lifetime Event Logging

Comprehensive logging feature means fault conditions are easily identified.

∨

Automatic Reset

Automatically resets trips in defined situations. Reduces the requirement to send a service technician to reset nuisance trips.

∨

i42 Smart Application Pre-program Suite

The automatic functionality has been expanded so that more features can be configured without referring to parameter lists.

∨

Ease of Use

The display will show all messages in full and multiple different global languages. The use of graphic/ schematic images facilitates complete understanding. Detailed logging aids setup and onboard USB allows configurations to be uploaded/downloaded and emailed.

Specification

Designation	3-phase SCR Energy Saving Motor Controller
Current	Size 1 up to 100 A Size 2 up to 195 A Size 3 up to 500 A Size 4 up to 722 A Size 5 up to 1080 A
Bypass	Internally Bypassed – Size 1 to 3 No Bypass – Size 4 to 5
Motor Protection	Full I²T Motor Overload with memory Current limit set at 4.5x to meet IEC standards
Supply Voltages	208, 230, 400, 460 volts as standard Allowing for varying supply frequency 45–65 Hz
Standard Duty Rating	Trip Class 10 3x 23 or 3.5x 17 5 starts/hour (VMX-SGY-101 to VMX-SGY-205) 3 starts/hour (VMX-SGY-301 to VMX-SGY-505) 90% duty
Frame Sizes	Up to 100 A 95mm wide Up to 195 A 143mm wide Up to 500 A 205mm wide Up to 722 A 490mm wide Up to 1080 A 635mm wide
Enclosure Type	Up to 195 A IP20/NEMA 1 – with finger guard Above 195 A IP00/NEMA 1 Optional Finger Guards up to 195 A to ensure full IP20 enclosures
Terminal Position	Terminal position/spacing to match common contactors and circuit breakers
Terminal Construction	Up to 195 A Cage Clamp Above 195 A Plain Busbar
Control Voltages	24VDC & 110/230VAC (VMX-SGY-101 to VMX-SGY-305) 110VAC or 230VAC (VMX-SGY-307 to VMX-SGY-505)
Ambient Operating Conditions	-20ºC to 50ºC (VMX-SGY-101 to VMX-SGY-309) -20ºC to 40C (VMX-SGY-401 to VMX-SGY-505) Up to 60ºC with de-rating
Motortronics iERS Energy Saving Technology	Yes
In Delta/6 wire connection	Yes
Display Technology	3.5" Colour-TFT Touch Screen
Keypad	Optional full colour touch keypad available for remote/door fitting
Languages	English, Arabic, Chinese (Mandarin simplified), Dutch, French, German, Greek, Italian, Japanese, Korean, Polish, Portuguese, Russian, Serbian, Spanish, Turkish, Vietnamese
Input/Outputs	3 x NO programmable output relays 1 x NC programmable output relays 3 x programmable digital inputs 1 x PTC thermistor input 1 x 0-10V/4-20mA Analogue input 1 x 0-10V/4-20mA Analogue output 1 x USB
Comms	Standard: Modbus RTU Optional: Anybus providing Ethernet IP, Modbus TCP & Profibus DP
Data Logging	Equipped with 4Gb memory, allowing the logging of over 3.5 million events Date of first start (warranty date) Total number of soft starts Number of soft stops Number of error events Display event logs Export data in CSV format
EU/IEC Legislation	IEC 60947-4-2: 2012 Low Voltage Directive Battery Directive Energy Using Products/Energy Related Product Directives
Environmental	Products comply to REACH, SVHC, RoHS and WEEE
Standards	CE, ETL, CETL
Warranty	2yrs
Field Serviceability	Firmware upgrade from USB port

Model Selection

Minimum current ratings based on typical rated operation currents of motors for the corresponding rated operational powers.

Current rating optimised for kW@400V & HP@440-480V - Ref IEC 60947-4-1:2009 Table G.1

	Trip Class 10	Trip Class 20	Trip Class 30
Rated Starting Capability	3 × Motor Current – 23 secs 3.5 × Motor Current – 17 secs	4 × Motor Current – 19 secs	4 × Motor Current – 29 secs

Typical Applications	Agitator
	Compressor
	  Rotary Vane
	  Unloaded
	  Scroll
	Conveyor
	  Unloaded
	Bow Thruster
	  Zero Pitch
	Fan
	  Low Inertia or < 85 A
	Feeder
	  Screw
	Lathe Machines
	Mixer
	  Unloaded
	Moulding Machine
	Plastic and Textile Machines
	Pump
	  Submersible - Centrifugal
	  Submersible - Rotodynamic
